

(a) OL/CL Train-Test Mismatch

Training Objective

$$\text{OL} \quad \min_{\theta} \mathbb{E}_{s \sim \mathcal{D}} \left[|\pi^*(s) - \pi_{\theta}(s)|^2 \right]$$

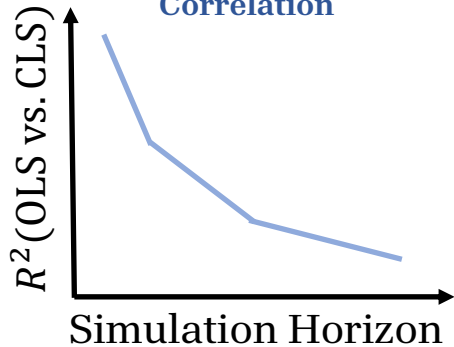

$$\text{CL} \quad \max_{\theta} \mathbb{E}_{\tau \sim \pi_{\theta}} \left[\sum_{t=0}^T \gamma^t r(s_t, a_t) \right]$$

Evaluation Protocol

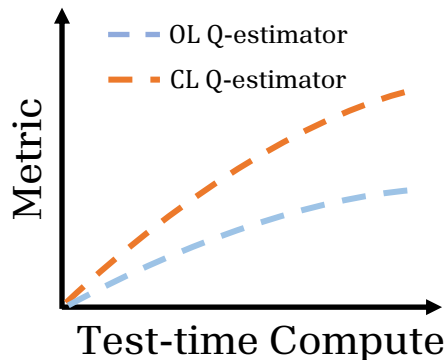

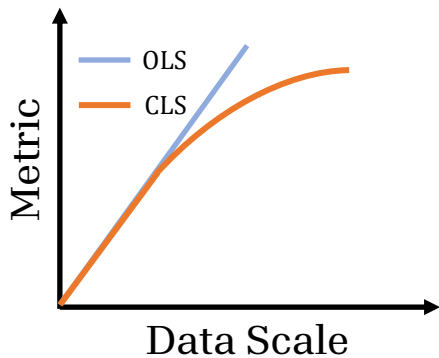

(b) OL-to-CL Predictive Reliability Inconsistency

Decaying OL-CL Correlation

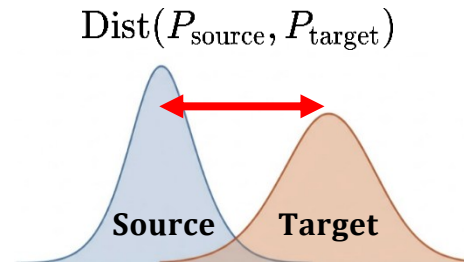

Diverging Scaling Dynamics

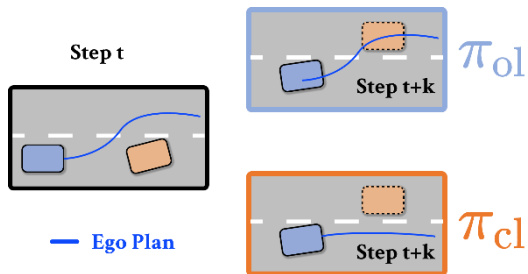

(c) Attributions

Observational Domain Shift

Objective Mismatch

$$J(\pi_{\text{ol}}) \neq J(\pi_{\text{cl}})$$
